

STAAND 2.1 & 2.1.1: Smarter Processes, Seamless Experience

Release Notes: July 6, 2025

We're excited to introduce STAAND 2.1 and 2.1.1! These updates focus on streamlining workflows, improving dashboards, and enhancing automation across multiple modules. Here's what's new:

Global Highlights

- Improved Dashboards – Cleaner layouts with less scrolling and role-based customization for a more user-friendly experience.
- Better Visibility – Contract note reports now display the name of the staff person who created the note for transparency.

Case Management

- Enhanced Dashboards with less scrolling and more user-friendly design.
- Dashboards were fixed for all private agency partners.
- Enhancements made to the Family Roadmap and Case Plan, including validations, show/hid logic based on permanency goal, etc.
- The Contract note report now displays the name of the staff person who created the note.
- The Case Plan PDF document now includes the court neglect ID(s).
- Added additional value to the Case Closure reason picklist.

Intake & Investigations

- Added a data entry validation trigger for child age to ensure that the correct age is being captured on the record
- Update made to the list of Screen Out Reason options to reflect current practice.

- The Contract note report now displays the name of the staff person who created the note.
- Fixed several functional bugs related to creating Source Provided Individual (SPI) records.
- Fixed closure function of Non-Investigatory Response referral types.
- Completed remaining items for full certification of the Danger and Safety Assessment
- The Contract note report now displays the name of the staff person who created the note.
- Fixed bugs related to the Investigation Summary document
- Fixed issues related to the MPD portal, etc.

Eligibility

- Increased system automations including:
 - Auto-setting redetermination date
 - Adding age guardrails
 - Created better naming logic
- Updated with DCAS integration enhancements
- Ability to create bulk assignment of records, etc.

Placement

- Enhanced the placement request assignment and processing.
- Enhancements made to the Resource Parent Portal functionality to include information on potential placements.
- The Contract note report now displays the name of the staff person who created the note.
- Updates were made to the Placement and Kinship Master Dashboard; etc.

Provider

- Added Contact note entry functionality to Provider record.
- The Contract note report now displays the name of the staff person who created the note.
- Updated Provider total capacity items.
- Automated the process for setting the primary address for a Provider.
- Completed the first steps for future upgrades to the Provider licensing and training portal, etc.

Finance

- Enhanced functionality related to episodic payments
- Closed the gap in the ability to submit invoices for future dates
- Enhanced display for invoice dashboards
- Improved private agency dashboards
- Ability to update invoices, etc.
