Course Overview

Welcome to the FACES.NET one-day Placement training. This course is designed to give students an understanding of the functions in FACES.NET and Provider Web pertaining to Placement. The course is divided into sections, each having its own set of objectives and corresponding to a particular area of functionality in the FACES.NET and Provider Web.

A FACES.NET Scenario has been constructed to link the sections together and mimic the way FACES.NET will be used for Agency business. In the classroom, trainees will participate in a guided walkthrough of the FACES.NET Scenario in order to practice activities based on real-life situations.

Please keep in mind that the FACES.NET system is frequently updated, and some of the screens may have slightly changed after this document was printed.

Course Objectives

Upon completion of this course, the trainee will have an understanding of how CFSA business process correlates with FACES.NET and Provider web data entry. FACES.NET Placement training will reinforce the lessons covered in the three-month Pre-Service Training Program offered by the Office of Training Services. By giving trainees practice time in the classroom, they will build confidence in their ability to properly enter and access data in the FACES.NET system.

Remember that a system is only as good as the information it receives. This course will train trainees how to supply FACES.NET the proper information so that it can remain a Federally certified Child Welfare Information Systems in the Nation. Best Wishes!

Introduction

What is FACES.NET?

FACES.NET is the District of Columbia's Statewide Automated Child Welfare Information System (SACWIS). The Child and Family Services Agency (CFSA) is the District of Columbia's child protection agency, which employs more than 900 social workers, and partners with fifteen private agencies. FACES.NET is designed to support social workers and the Agency in the following areas:

- § Case management activities, such as documenting contacts/visits, writing case plans and court reports;
- § Issuing payments to service providers;
- § Collecting data to produce outcome-based management;
- § Standardizing policy and practice.

FACES.NET has enabled the Agency to collect and disseminate information to diverse audiences including the Court Monitor, the Mayor's Office, The Washington Post, Federal oversight agencies such as the General Accounting Office (GAO), Administration of Children and Families (ACF), and Congress.

How to Use this Manual

This FACES.NET Placement manual is designed to introduce and reinforce the concept of using an automated information system to improve child welfare practice. In particular, the guide focuses on the responsibilities of social workers, who are the front-line workers of the Agency.

This manual further serves two functions. First, it will be your guide during the FACES.NET portion of your CFSA Placement training. With your instructor, you will complete each of the Sections and gain an understanding of how to use the FACES.NET system in your day-to-day case management responsibilities. You will complete the Sections over the one-day course. Each section is organized in an easy-to-read manner laying the groundwork with a Practice Overview segment. Afterwards there are detailed step-by-step instructions on how to accomplish that topic using FACES.NET.

The second function of this manual is to serve as a desktop guide for FACES.NET use after you have completed the initial training. You may keep this copy of the manual, and make any notes that you desire during class. At the end of each section is a page designated for note-taking. Later, if you need to review how a particular task is performed in FACES.NET, you can look it up at your convenience.

This document adheres to standardized technical writing conventions. All command buttons are displayed the way they appear on the computer screen. All commands are in bold, indicating that an action should be taken. Each scenario is introduced using real case

stories or training activities in order to provide an appropriate context for the particular module. Throughout the manual, participants in the Jackson case are highlighted using the underline feature.

How to Get Help

If you still have question after consulting this resource, you are of course welcome to contact the FACES.NET Helpdesk. Helpdesk staff is available from 8:00 AM - 5:00 PM every weekday to assist with FACES.NET and technical questions. The FACES.NET helpdesk can be reached at 202-434-0009.

The Family Case

The Jackson family case is the case you may be familiar with from other elements of your Pre-service training, and is used as the sample case in this document. The scenario that you may use during the actual FACES.NET training may slightly differ. If so, follow your instructors' directions on how to reconcile this manual with the case details you see in FACES.NET. Details of the Jackson family case begin on the following pages.

Field Practice Case

Learning Objectives:

1. Through using a case illustration, workers will have a better understanding of CFSA's programs and policies.
2. Through case illustration, workers will be able to understand how to effectively deliver services to clients.

Case Name: Shanté Jackson

Case Description:

The Jackson case came to the attention of Child and Family Services Agency's Child Protective Services Administration due to an allegation of abuse and neglect against Ms. Jackson. Ms. Jackson was previously known to CFSA. A neighbor reported Ms. Jackson's young children were left home alone and were seen in the streets unsupervised, unkempt and inappropriately dressed. It was also alleged that there were drug trafficking activities in Ms. Jackson's apartment. Upon investigation of the allegations, you observe that one child had (what appeared to be) belt marks on both arms and on her back.

Household Composition:

Family Description:

Shanté Jackson is a 30-year-old, single, African American female. She is the mother of seven children and two grandchildren. She has a 7th grade education and no history of employment. Shanté has a history of substance abuse, sexual abuse, and depression. She currently uses cocaine and alcohol and is involved in selling drugs from her apartment. Shanté receives public assistance. Last month, she was beaten by one of her drug dealer boyfriends. She received multiple bruises to her head and body, a broken arm, and a black eye. As a result, she continues to suffer from frequent severe stomach pains and headaches. Shanté is estranged from her family members and has no contact with the biological fathers of her children. She does not have a support system or friends.

Paul Williams is a 16-year-old, African American male. He attends Carter Senior High School where he is in the 9th grade for the third time. His grades are poor and he is often truant. Socially, Paul functions at a very low level. He has few friends, displays extreme anger and aggression towards others, and often gets into fights with peers and school officials. Paul smokes marijuana and drinks beer at least twice per week and on weekends. He also assists his mother sell drugs from their home. He has been involved in petty thefts and has had frequent trouble with law enforcement officials.

Femalé Scott is a 15-year-old African American female. She has two small children Rodney, age 2, and Kiana (Bebe), age 6 months. Rodney displays temper tantrums and aggressive behavior that are often difficult for Femalé to handle. Otherwise he is progressing well and is happy and healthy. Femalé dropped out of junior high school when she became pregnant with her son Rodney. She sporadically attended an adult education program until she became pregnant with Kiana. During her pregnancy with Kiana, she occasionally drank beer and smoked marijuana. Currently, Femalé does not attend school. She is unaware of the whereabouts of her son Rodney's father. However, she has sporadic contact with Kiana's father, Ricky Boone, who provides no financial support to his daughter. Femalé smokes marijuana and drinks alcohol. She often hangs out on the corner with her friends and leaves Rodney and Kiana at home with her seven-year-old sibling, Tanisha. Although Femalé lives with her mother, they have a strained relationship. They frequently argue and fuss at each other regarding Femalé's children and household responsibilities.

Rodney Scott is a 2-year-old, African American toddler. He is a happy and healthy child. However, he displays temper tantrums and aggressive behavior that are difficult for his mother to handle. Rodney is progressing well developmentally. He enjoys playing with his 6 month old sibling, his aunt and uncles. He also enjoys watching Barney and Teletubbies.

Kiana Scott (known to her family as Bebe), is a 6-month-old African American infant. She is progressing poorly physically and developmentally. Kiana possibly has failure to thrive syndrome. However, she sporadically receives her well baby check-ups as Femalé often forgets her appointments. Kiana's eating habits are poor; she has not gained adequate weight in the last three months and has some developmental lags. Kiana cries excessively when she is not being held or played with.

Keyshawn Jackson is a 12-year-old African-American male and twin brother of Reyshawn. Keyshawn currently attends Parker Junior High School, where he is in the 6th grade. He

receives special education and is classified as emotionally disturbed. Keyshawn's grades are poor. He bullies other children in his class and is often involved in altercations. Keyshawn is disrespectful to his teachers and other school officials. He has been suspended twice in the last month. His grades are poor. Keyshawn displays anger and aggression both in school at home. His mother is unable to handle his angry outbursts and rages. He also destroys property at home and frequently gets into fights with his siblings and peers in the neighborhood.

Reyshawn Jackson (Rey-Rey) is a 12-year-old African-American male and twin brother of Keyshawn. Reyshawn attends Parker Junior High School, where he is in the 6th grade. He receives special education and is classified as learning disabled. Reyshawn is socially withdrawn and often appears sad and depressed. Reyshawn also stutters and prefers not to talk in order to avoid being teased. He has few friends and has difficulty fitting in with his peers. His grades are poor, but he tries very hard. At home he is sad, withdrawn, and is teased by his siblings.

Tanisha Holmes is a 7-year-old African-American female. She currently attends Lee Elementary School, where she is in the 3rd grade. Tanisha is an outgoing and friendly child. However, she is often attention seeking and overly affectionate with adults. Socially, she has few friends and gets along well with peers. Academically, she has difficulty with reading and math. She participates in a reading and math resource program at school and tries very hard to succeed. She is well liked by her teachers. Tanisha suffers from Enuresis and occasional Encopresis. She is embarrassed by her condition due to the fact that her classmates tease her about her odor. Tanisha also needs glasses. At home, Tanisha is overly sweet and compliant. However, her mother often physically punishes her for wetting and soiling herself. Tanisha also has unrealistic expectations and adult responsibilities placed on her, as she is often the caretaker for the younger children (Latonya, Lakeisha, Rodney, and Kiana) in the home. Consequently, Tanisha receives a beating for the wrongdoings of the other children. Tanisha enjoys her role as caretaker as she doesn't have many friends.

Latonya Holmes is a 5-year-old African American female. She attends Lee Elementary School, where she is in kindergarten. Latonya enjoys school and is generally a happy child. Latonya suffers from chronic bronchial asthma. She often requires hospitalization after an attack. Latonya's bronchial asthma is controlled with medication. At home, Latonya is quiet and withdrawn and cries easily. Latonya sleeps with her mother due to lack of space in the home. However, her mother's boyfriend also sleeps in the same bed occasionally. Due to the sleeping arrangements, Latonya has been subjected to ongoing sexual molestation by the mother's boyfriend. She revealed this to her sister Tanisha and told her not to tell. Latonya enjoys watching Barney and Teletubbies on television.

Lakeisha Jackson is a 3-year-old African American female. Lakeisha was born with a positive toxicology to cocaine. She was also born with the sickle cell trait. She was placed in foster care at birth, but returned home after three months. Lakeisha is developmentally delayed. She uses one to two word phrases, walks on her toes, and sucks her thumb. She is not potty trained and continues to use a bottle. Lakeisha also sleeps in the bed with her mother and Latonya. Lakeisha has frequent colds. She enjoys watching Barney and Teletubbies.

Description of Environment:

The family resides at 1254 Edgefield Terrace # T105, at the Brookfield Housing projects, in the N.E. section of Washington, D.C. The neighborhood is predominantly comprised of African Americans and some Hispanics. The neighborhood is heavily drug and crime infested. However, there are many community services and resources in the area. This includes substance abuse programs, mental health clinics, the Edgefield Collaborative, hospitals, and shelters.

Description of the Home:

The Jackson home consists of two bedrooms, one bathroom, a small living room/dining room, and a tiny kitchen. Home maintenance is very poor. The apartment reeks of urine, and is cockroach infested. There is dirty clothing and other miscellaneous items scattered all over the apartment floor. The kitchen is filthy with dirty dishes in the sink, on the countertops, and on the floor. The apartment is sparsely furnished with one couch, a small dining room table, one small television, two full size beds, one crib, and a playpen.

(This Page Intentionally Left Blank)

Practice Overview

FACES.NET is strategically used to support case practice and the business processes within each Administration. There are common icons and buttons that run throughout FACES.NET and aid in the ease of use of the FACES.NET screens. This segment illustrates some important features to know about the FACES.NET system.

Definition of Icons and Language Usage in FACES.NET

This segment reviews icons and language usage in this guide relative to FACES.NET.

Drop-Down Menu

Figure 2.1

The gray command buttons at the top of the FACES.NET screen is the Drop-Down Menu. These command buttons, which features the Referral, Case, Client, Provider, and Admin, is always accessible in FACES.NET, no matter what screen you are on. The options, within the menu, dynamically change as different entities are brought into focus, but the five main command buttons remain accessible. The menu includes a parent/child system. What this means is that any menu that has a gray arrow on the right side of the menu contains additional screens within it.

Breadcrumbs Toolbar

Figure 2.2

This toolbar is displayed when a specific track (Referral, Case, etc.) is selected. This toolbar will change depending on where you are in the system. Blue areas are previous selections accessed through these command buttons display menu listings which will dynamically change. The orange button is the screen that is currently in the work area.

Quick Link

Figure 2.3

The Quick Link is a new functionality within FACES.NET. This box, in the upper right hand corner of FACES.NET, allows for the entry of a Referral, Case, Client, Provider, Staff, Workshop ID, or Contract ID to bring that entity into focus.

Toolbar Additional Screen Icon

Button with Icon
Figure 2.4

Button with no Icon
Figure 2.5

The additional screen icon is a small picture found on certain toolbar buttons. If the button has this icon, it means that there are lower level screens associated with that button. When you click on that button, it will move to the left side of the breadcrumbs toolbar, and a new series of buttons will appear on the right side of the toolbar. If a toolbar button does not have an icon, it means that there is only one screen associated with that button.

Radio Buttons

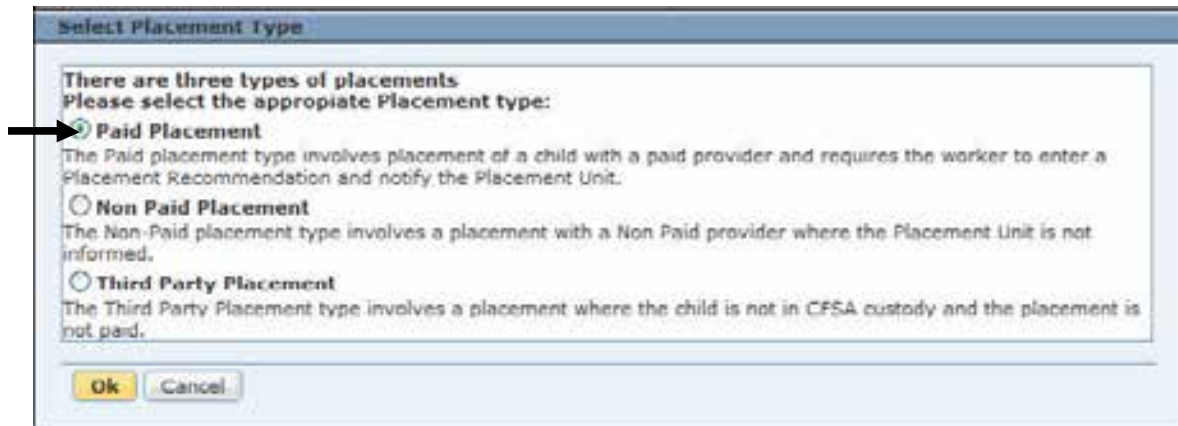

Figure 2.6

Radio buttons are the round circles found next to certain fields in FACES.NET. These allow you to quickly select a displayed option. Once selected, the radio button will turn to green. Only one radio button may be selected at a time.

Select Boxes

Figure 2.7

Select Boxes are collections of check boxes within a pop-up screen. These allow you to quickly select a displayed option. Once selected, the check box will contain a • inside the box. Unlike the radio button, more than one check box within the select box may be selected at a time.

Command Buttons

The row of gray/orange buttons on the bottom of any FACES.NET screen is called the Command buttons. These buttons are used to perform specific actions. A list of common command buttons and their functions are provided below:

SECTION 3: PLACEMENT OVERVIEW

Performance Objectives

(This Page Intentionally Left Blank)

Placement Overview

When a child is in immediate or imminent danger, a broad range of safety oriented responses that protect the child are considered including placement arrangements for the care of the child care in a licensed foster, relative, kinship and adoptive home or facility. When family stability is possible, the social worker should ensure that the family was notified about and, if willing, was offered appropriate resources or services to prevent the child's out-of-home placement. Within twenty-four (24) hours of receiving an abuse or neglect report, the social worker must conduct a thorough search for available family members, especially the parents and relatives as placement resources.

Once it appears that out-of-home placement will be needed, the referring social worker must work to involve the parent and child in the placement determination and selection, whenever possible and appropriate. If the family cannot identify an acceptable kinship placement, or some other form of third-party placement, the child is to be referred to the Office of Placement Services (OPS) under the Office of Licensing, Monitoring and Placement Support for the location of an appropriate CFSA placement. In the case of planned placement, requests for placement shall be submitted to OPS within thirty (30) but no later than ten (10) working days of the date that placement will be required. For other situations, the placement request is to be made as soon as it becomes apparent that a CFSA-arranged placement will be needed.

Placement Options

CFSA offers the following foster care placement options:

1. Voluntary Placement - is a placement involving a written agreement between a child's parent(s) and the agency under which the child is removed from his or her home and placed in foster care for a limited time. This placement may not exceed 21 days. The agreement can be extended an additional 21 days with approval by the Administrator. In order to receive federal funds for voluntary placement, protection must be provided to the child. If the placement lasts more than 180 days, the court must make a determination that continued voluntary placement is in the best interest of the child or whether there is need to file a neglect petition. This placement option is rarely used unless the social worker can assess that the placement will last no longer than 42 days.
2. 30-Day Emergency Placement - is a placement in a 30-day licensed foster or group home. This placement is considered temporary and the child should be moved to a long term home setting at the end of the 30 days.
3. Traditional Foster Care in Licensed Foster Home - is placement in a foster home that is licensed by CFSA or the jurisdiction in which the home is physically located. This home provides ongoing foster care for all children placed away from their parents or guardians and for whom the agency has legal custody and physical care responsibility.

4. Kinship Care Licensed Foster Home - is a placement in a relative foster home which has been licensed by CFSA or the jurisdiction in which the home is physically located. This home provides ongoing foster care for all children placed away from their parents or guardians and for whom the agency has legal custody and physical care responsibility.
5. Therapeutic Licensed Foster Home - is placement in a licensed foster home that addresses the needs of children/youth who have been diagnosed with serious to severe mental, emotional and physical health problems. Many of these homes are time-limited and the plan for the child is remediated and moves to reunification with the parent or some other permanency plan.
6. Teen Parent Group Home - is a placement in a licensed group home designed to meet the needs of teens and their young children.
7. Community Based Group Home - is a placement in a licensed group home for youth twelve (12) years old and through eighteen (18) years old. Group homes are designed for both emergency and long-term placement. No more than eight youth should reside in a group home.
8. Independent Living Residential Units - Units for supervised Apartment living for youth moving toward independence.
9. Residential Care Placement – is a placement that provides intensive treatment services to address mental and emotional problems for youth in foster care. These placements usually last from one to two years but occasionally have been longer. Referrals are made for Residential Placement through contacting the CFSA Residential Placement Unit (RPU).

Placement Process

Generally, out-of-home placements are appropriate in any of the following situations:

- § When a child who has been neglected, abused, or abandoned by his/her parent and cannot, based on the social worker's assessment, safely remain in that home, even with the provision of services;
- § When a child, who is placed with another facility or agency, requires transfer in order to receive the most appropriate medical, psychological, social, and educational services; and
- § When a child's family which experiences, or is about to experience, an anticipated short term change in circumstances (i.e., parental drug treatment, hospitalization, etc).

The sections below will provide in depth information regarding the placement process.

SECTION 5: PLANNED PLACEMENTS

Performance Objectives

In this Section, you gain confidence in your ability to:

- g Verify and Record a Child's Removal Status
- g Make a Placement Recommendation
- g Record Placement Information

(This Page Intentionally Left Blank)

Practice Overview

Once it appears that out-of-home placement will be needed, the referring social worker must work to involve the parent and child in the placement determination and selection, whenever possible and appropriate. If the family cannot identify an acceptable kinship placement, or some other form of third-party placement, the child is to be referred to Office of Placement Services (OPS) for the location of an appropriate CFSA placement.

Planned placements allow the social worker to assure the best possible placement match for the child and allows for the efficient delivery of pre-placement services to ease the child's adjustment. Requests for planned placements shall be submitted to the OPS within thirty (30) but no later than ten (10) working days of the date that the placement will be required.

Social workers may be involved in planning for various out-of-home placements during the casework process. For example, a child who is in a residential treatment center, may be ready for discharge into a community based setting, or a teenager, who becomes pregnant, may require referral to a teen mother facility. These types of situations are likely to be anticipated. Planning allows the social worker to assure the child the best possible transition from one setting to another. He/she is able to anticipate placement changes and to offer a planned, orderly delivery of pre- placement services, including preliminary interviews and visits, to ease the adjustment. Planning also affords CFSA's Placement workers a longer period of time to identify an appropriate match between the child and caregiver, thereby reducing the necessity for subsequent placement due to placement disruptions.

The social worker shall consult with his or her supervisor on all placement requests. Assessment of the child's needs and identifiable information is used to match children with providers, and shall be included in the Placement Recommendation screen in FACES.NET.

Social worker shall forward to the Placement Unit information that will assist in making a placement decision that is in the child's best interest and in the least restrictive and most family-like setting.

Out-of-home placements are appropriate in any of the following situations:

- § When a child who has been neglected, abused, or abandoned by his/her parent and cannot, based on the social worker's assessment, safely remain in that home, even with the provision of services;
- § When a child, who is placed with another facility or agency, requires transfer in order to receive the most appropriate medical, psychological, social, and educational services;
- § When a child's family which experiences, or is about to experience, an anticipated short-term change in circumstances (i.e. parental drug treatment, hospitalization, etc).

The following rules apply for placement eligibility:

- § A child must have an open home removal and CFSA legal status before a placement entry date is entered in the social worker entry date field;
- § If the child is in need of a therapeutic foster home, the social worker must provide diagnostic information to support the need for a therapeutic setting;
- § If the child is being placed out-of-the District of Columbia with relatives, or a treatment facility, an ICPC must be completed.

The process of a social worker initiated planned placement is illustrated in Figure 5.1.

Record a Placement

Once the home removal and legal status information for a client has been entered, a placement can be recorded. That placement will remain "In-Process" until the Placement Unit takes the recommendation from the social worker and then "Authorizes" a placement. Once that authorization is approved, the social worker is able to enter that placement in FACES.NET.

Importance of Placement Information

It is essential that the whereabouts of a child under the care of the agency be known at all times. The agency is responsible for all children under their care. It is the duty of all social workers to ensure that the safety and well being of the child is known. If we do not know where the child (ren) is, we cannot ensure the safety of the child (ren).

Before entering a placement, perhaps you would like to see a history of the child's past placements. You can view these past placements on the List of Placement Episodes screen. This screen is Read-only.

Point to Remember:
 The placement recommendation must be approved by the supervisor.
 As soon as the supervisor approves the placement recommendation, an automatic administrative assignment to the case will be given to the placement unit and this screen will become "Read Only."

The newly created placement recommendation is routed to the supervisor in the Placement Services Division for approval.

The key element for a supervisor to look for prior to approving a placement recommendation is to ensure that the child is not already placed somewhere else under the care of the agency. There can be instances where duplicate placement recommendations are initiated. If duplicate placement recommendations are made, there is a possibility that the child is recorded as being in more than one placement. The duplicate recommendation that gets authorized may also cause precious space in a foster home to be allocated to someone that has already been placed.

The supervisor ensures that the recommendation made by the social worker suits the needs of the children and issues the approval.

Next, a suitable provider is identified for the client based on the recommendations made.

SECTION 6: PLACEMENT PROVIDER WEB

Performance Objectives

In this Section, you gain confidence in your ability to:

- g Create an Emergency Placement
- g Identify a Suitable Provider

(This Page Intentionally Left Blank)

Practice Overview

Provider Web allows private placement providers to have up to minute placement information for children in their auspices and tracks information regarding provider capacities and vacancies of provider homes and allows real-time access to placement information. Provider Web is accessible through the World Wide Web and connects seamlessly with FACES.NET.

Emergency placements shall be made only when there is an unforeseen and unavoidable removal from either a child's legal guardian or resource home. An Emergency placement request is made as soon as it becomes apparent that a CFSA-arranged placement will be needed and the steps involved are accelerated. Emergency placements can only be entered by supervisors, Placement Providers, and the Placement Unit.

Out-of-home placements are appropriate in any of the following situations:

- § When a child who has been neglected, abused, or abandoned by his/her parent and cannot, based on the social worker's assessment, safely remain in that home, even with the provision of services;
- § When a child, who is placed with another facility or agency, requires transfer in order to receive the most appropriate medical, psychological, social, and educational services; and
- § When a child's family which experiences, or is about to experience, an anticipated short-term change in circumstances (i.e. parental drug treatment, hospitalization, etc).

The following rules apply for placement eligibility:

- § A child must have an open home removal and CFSA legal status before a placement entry date is entered in the social worker entry date field;
- § If the child is in need of a therapeutic foster home, the social worker must provide diagnostic information to support the need for a therapeutic setting;
- § If the child is being placed out-of-the District of Columbia with relatives, or a treatment facility, an ICPC must be completed.

FACES.NET Guide

The previous segment focused on agency practice revolving around planned placements. An emergency placement in Provider Web reduces the number of in process placements and allows placement without going through the recommendation screens. This section will guide you through the relevant Provider screens involved when creating an emergency placement.

FACES.NET Guide

The previous segment focused on agency practice regarding emergency placements in FACES.NET. To record an emergency placement in FACES.NET the social worker will have to first record the home removal and legal status of the child. This section will guide you through the relevant FACES.NET screens.

FACES.NET Scenario

Role: You are a supervisor in the CPS unit.

Baby Kiana, a 6-month-old was removed from the home by the CPS investigative worker at 4:00 am. The neighbor, Tracey Reed placed a call to the CPS hotline at 2:15 am reporting that a young baby had been screaming for several hours. In addition she heard Femalé Scott cursing and shouting profusely: Tracy heard dishes crashing. The Hotline worker having completed the case connect instructs the investigator to drop the baby off at Provider Agency A for emergency placement.

You have determined that for the safety of Kiana Scott she will need to be removed from the home. Kiana will immediately be placed into a Traditional Foster Care program.

SECTION 8: REVIEW PROVIDER DETAILS

Performance Objectives

In this Section, you gain confidence in your ability to:

- g Search for a Suitable Provider
- g Review Provider Information

(This Page Intentionally Left Blank)

Practice Overview

Placement involves identifying a suitable provider for placement service delivery.

The provider function allows workers to review information regarding specific providers. Examples of Providers are Group Homes, Therapeutic Treatment Centers, and Independent Living arrangements among others.

There are two main types of providers, CFSA and Community. CFSA providers may be contracted, non-contracted or both. The CFSA contracted providers receive payment from the District through an invoice and payment function generated through the FACES invoice and payment systems. However, Community Providers' services and/or placements are tracked in FACES.

The Resource Development Unit as well as collaborative agencies has the authority to enter providers into FACES using the Provider directory function. The information gathered is dependent upon the type of services or category of the provider entered. Workers have access to view Provider Directory information in order to review information that will help them to make the determination of whether a given provider is available and suitable to provide services or accept placements.

Although the Provider function includes contract and financial information, the main purpose of the Provider function is to allow staff to track providers' availability and furnish a valid listing of providers and their services and/or placements available for clients in need.

The Directory function tracks detail information specific to each provider. Within the Directory, several screens allow workers to capture or view information regarding the provider's location and contacts, services provided to clients, training needs, incident information, and documents received and sent to the provider.

Provider information is maintained in a single database to furnish staff with accurate up-to-date information.

Performance Objectives

- g Confirm Placements

(This Page Intentionally Left Blank)

Practice Overview

Provider Web gives private placement providers up to minute placement information for children in their auspices, tracks information regarding provider capacities and vacancies of provider homes and allows real-time access to placement information. Provider Web is accessible through the World Wide Web and connects seamlessly with FACES.NET

Placement Unit workers have the ability to confirm all in-process placements that are ready to be invoiced. Confirming Matched Placements requires checking all in-process placements to ensure that information recorded does match and is correct for invoicing.

Confirming Matched Placements involves verifying that information entered in by the social worker through FACES.NET correlates exactly with the information entered in by the provider through Provider Web. The information is confirmed by the Placement Unit worker through Provider Web.

FACES.NET Guide

The previous segment focused on agency practice revolving around Confirming Matched Placements in Provider Web. The section below will guide you through the relevant Provider Web screens involved when creating an emergency placement.

SECTION 10: CHANGE SERVICES OF EXISTING PLACEMENTS

Performance Objectives

In this Section, you gain confidence in your ability to:

- g Change Services of an Existing Placement

(This Page Intentionally Left Blank)

Practice Overview

Provider Web gives private placement providers up to minute placement information for children in their care, tracks information regarding provider capacities and vacancies of provider homes and allows real-time access to placement information. Provider Web is accessible through the World Wide Web and connects seamlessly with FACES.NET.

Only Placement Unit workers have the ability to change the service of an existing placement based on the provider's contract. This is most useful in situations where the service needs of a child change. A Placement Unit worker can change services of a client without having to exit that client out of his/her placement.

FACES.NET Guide

The previous segment focused on agency practice revolving around Changing the Service of Existing Placements in Provider Web. The section below will guide you through the relevant Provider Web screens involved when changing the service of an existing placement. Changing the service of an existing placement is based on the provider's contract.

FACES.NET Scenario

Role: You are a Placement Unit worker.

Rodney Scott, needs to be placed in a Therapeutic Foster home. One of the trained Finance staff members from Provider Agency A called the Placement Unit complaining that Rodney's placement was not recorded accurately by his social worker. The staff member went into Provider Web to record the date and time that Rodney came into care with one of Provider Agency A's facilities; however, they noticed that the social worker's service indicated traditional foster care. Since Provider Agency A knows that Rodney was placed into a therapeutic foster home, they are informing the Placement Unit so that the provider is properly paid.

SECTION 11: RESOLVE INVOICE DISCREPANCIES

Performance Objectives

In this Section, you gain confidence in your ability to:

(This Page Intentionally Left Blank)

Practice Overview

Provider Web gives private placement providers up to the minute placement information for children in their care, tracks information regarding provider capacities and vacancies of provider homes and allows real-time access to placement information. Provider Web is accessible through the World Wide Web and connects seamlessly with FACES.NET.

Payments are associated with paid placements and/or paid services. Each authorized “paid placement” or service generates a payment in association with a contracted or non-contracted service line. When a social worker makes a recommendation to the Placement Unit and the Placement Unit authorizes and approves the placement, payments to the provider will begin based on the Placement Unit’s entry date.

Before a Placement is invoiced, the Placement Unit enters the dates and times of the placement. In the event that the placement dates and times entered by the social worker and provider do not coincide with one another, the Placement Unit worker must confirm the correct information through conversation with the social worker and the provider.

Placement Unit workers have the ability to confirm all in-process placements that are ready to be invoiced. Confirming placements requires checking all in-process placements whose information does match and would cause an invoice discrepancy. Placements on the Invoice Discrepancy tab must move to the “Ready to be Invoiced” tab for the placement to be confirmed.

SECTION 12: REVIEW ICPC INFORMATION

Performance Objectives

In this Section, you gain confidence in your ability to:

- g Review Form ICPC 100A
- g Review Form ICPC 100B

(This Page Intentionally Left Blank)

Practice Overview

CFSA must comply with the Interstate Compact on the Placement of Children (ICPC) whenever a child may be sent to another state for any of the following reasons:

1. the placement is preliminary for an adoption;
2. the child will be placed into a foster home, group home residential treatment facility, or other institution;
3. the placements will be with a parent or relative; and
4. it is the placement of an adjudicated delinquent in another state's institution.

The sending agency is legally responsible for the child per Article V of the Interstate Compact statute. The receiving agency acts as an agent for the sending agency, and shall not make changes in a child's placement without prior authorization, which shall include the CFSA ICPC Office. This should be explained to the child and caretaker by both the sending and supervising agency prior to placement and at the time of placement.

SECTION 13: MANAGEMENT REPORTS

Performance Objectives

In this Section, you gain confidence in your ability to:

- g Access Management Reports
- g Access Online Reports
- g Access DDE Reports
- g Access Template Reports
- g Access File Cabinet

(This Page Intentionally Left Blank)

Practice Overview

This segment clarifies how to retrieve, view and print reports from FACES.NET. FACES.NET generates several types of reports: Management, On-line, Dynamic Data Exchange (DDE) and Template reports.

In order for the information in the reports to be meaningful, information in the system must be accurate and up-to-date. It is the worker's responsibility to enter detailed, up-to-date, and complete information into the FACES.NET system. Most functions in FACES.NET, Intake/Investigation, Case, Provider/Directory, Training, and Personnel, involve entering data that can be summarized in reports.

In addition, in this segment you will learn how to navigate in the File Cabinet, to place files appropriately in the File Cabinet and to move files among File Cabinet folders. The File Cabinet is accessed through the File Cabinet button on the main level toolbar. However, it is necessary to begin by bringing cases into focus in order to access File Cabinets for a specific case.

The File Cabinet is a storage bin for documents that relate to FACES.NET case, referral, assessment, and resource or staff person. The File Cabinet can contain FACES.NET-generated documents as well as Microsoft Word documents. By linking documents electronically, all users who have access to the File Cabinet have access to documents that relate to cases, referrals, assessments, etc. without sending electronic copies or checking out the physical case file.

FACES.NET Guide

Management Reports

Management reports allow supervisors, program managers and now social workers to track various statistics and measures of case management performance. For example, a management report that tracks cases with current case plans can be generated. Management Reports are also used to help ensure that the Agency is meeting goals established by the Court Monitor, the Department of Health and Human Services, the Mayor's Scorecard, among others.

Management Reports are accessed through the Admin module and will only appear if you have the appropriate security level. Management reports are now available for social workers via the Internet. They are non-modifiable but may be printed.

The following is a sample of reports used by the Placement Unit:

- § ADP034MM - Placement Type for CFSA Children with the Goal of Adoption As of...
- § ADP038MM - Duration, Origin, and Placement Type for Children with a Goal of Adoption
- § ADP047MM - Placement Type for CFSA Children with the Goal of Adoption Month of ... Best Practice # VIII.a

- Step 2: Select the Management Report button.

Step 5: Pick the Report Run Date.

Step 6: Click View.

Notes:

§ You may choose the report by the report number.

§ Click Report Titles to see a list of all available reports.

On-Line Reports

On-line reports are generated in FACES.NET and cannot be edited by workers. Staff should always "preview" an on-line report to review the report for accuracy before printing.

Steps Include:

Step 1: Open your Case.

Figure 13.3

- Step 2: Click the Reports button.
- Step 3: Select the Abscondence Summary Report. This report displays all abscondence information in the case that has been recorded in FACES.NET.

Note: As you page through the report, you see information that you entered in FACES.NET. Please do not print the report at this time.

DDE Reports

Dynamic Date Exchange (DDE) Reports are generated in FACES.NET, but are reviewed, saved, and printed from Adobe Acrobat. The report can be edited in Word. However, only when the worker returns to FACES.NET and corrects the information on FACES.NET screens and re-generates the report is the report truly accurate. Examples of DDE reports include transfer summaries and ICPC requests. In the example below, we will view the Medical Assistance form 30-A.

FACES.NET Scenario

Steps Include:

- Step 1: Place the cursor over the Case menu and click Reports.
- Step 2: Highlight the Medical Assistance (FORM – 30A) report and click Preview.
- Step 3: Select one or more clients from the list, and click Preview.
- Step 4: The report will be exported to Microsoft Word. If the Microsoft Word window does not appear, click the Word icon on the taskbar to display the window.
- Step 5: A copy of the report can be saved or printed. To save the report in Microsoft Word:
 - § Click the File button;
 - § Click Save As;
 - § In the appropriate field on the Save As pop-up window, enter a meaningful File Name; and
 - § Click OK.

Note: Review the report for accuracy. CAUTION: Do not correct information just on the report. Correct inaccuracies in FACES.NET screens and re-run the report. Only then is the information on the report and in FACES.NET the same.

Template Reports

A Template Report is very different from the other two reports just viewed. These are not reports generated with FACES.NET information. Rather, they are forms available to print and complete as necessary.

FACES.NET Scenario

Steps Include:

- Step 1: Place the cursor over the Case menu and click Reports.

- Step 2: Select a Template report (choose Unusual Incident report).
- Step 3: Click the Preview button to display a preview of the report.
- Step 4: Wait until the report is completely generated.
- Step 5: The report will be exported to Microsoft Word. If the Microsoft Word window does not appear, click the Word icon on the taskbar to display the window.
- Step 6: Save the report in Microsoft Word.
- § Click the File button;
 - § Click Save As;
 - § In the appropriate field on the Save As pop-up window, enter a meaningful File Name; and
 - § Click OK.

Note: After saving the report in Word, you are able to retrieve it again to review or print the report. You can also enter information directly into the Template report. You can save the completed Template (form) so that you can place it into the Case's File Cabinet. Please do not print the report at this time.

File Cabinet

The File Cabinet is a storage bin for documents that relate to FACES.NET case, referral, assessment, and resource or staff person. The File Cabinet can contain FACES.NET-generated documents as well as Microsoft Word documents. By linking documents electronically, all users who have access to the File Cabinet have access to documents that relate to cases, referrals, assessments, etc. without sending electronic copies or checking out the physical case file. The file cabinet also stores reports that are not to be amended. For example, transfer summaries are automatically stored in this file cabinet upon approval.

In this segment, you will learn how to navigate in the File Cabinet, to place files appropriately in the File Cabinet and to move files among File Cabinet folders. The File Cabinet is accessed through the Admin drop down menu. However, it is necessary to begin by bringing cases into focus in order to access File Cabinets for a specific case.

FACES.NET Scenario

In the Jackson case, we will view Kiana Scott's ICPC Forms for an out of state placement. We could also use the file cabinet to store additional case notes, letters, or other documents relating to the case. In the example FACES.NET Scenario below, we will review existing ICPC Forms.

Steps Include:

- Step 1: Place the cursor over the Admin menu, then File Cabinet, and click File Cabinet.

Step 2: File Cabinet is setup in a tree formatted layout. Click on the plus signs to the left of the folders to navigate to a particular document.

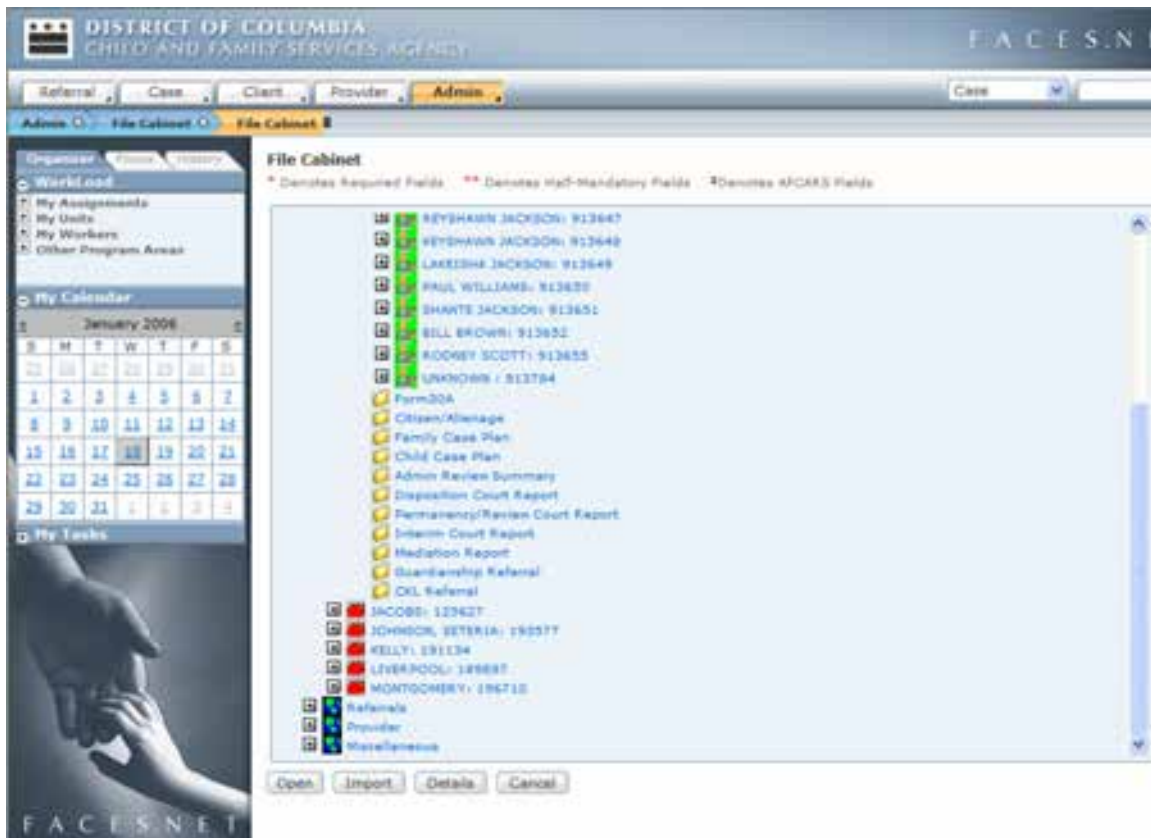

Figure 13.2

Step 3: Highlight the document and click Open.

Notes:

- \$ The Open command button opens the document that is highlighted.
- \$ The Import command button imports documents from your hard drive.
- \$ The Details command button shows who imported the document and when.
- \$ The plus signs on the left expand the topic. The minus signs on the left condense the topic.

The schedule of FACES.NET training courses is available monthly from the FACES.NET office via email.

SECTION 15: APPENDIX

(This Page Intentionally Left Blank)

Glossary of Terms

This Glossary of Terms contains basic information pertaining to the laws, regulations and practice principles which guide the operation of the Child and Family Services Agency (CFSA) of the District of Columbia.

The primary sources for materials in the Glossary are:

1. D.C. and federal law and regulation including definitions in use in the Adoption and Foster Care Analysis and Reporting System (AFCARS);
2. Program Instruction ACYF-PI-CB-96-01 entitled Amendments; Public Law 103-432;
3. Definitions established under the federal National Child Abuse and Neglect Data System (NCANDS);
4. CFSA staff experienced in child welfare practice; and
5. The LaShawn Revised Implementation Plan, August 1, 1994.

Abandoned Child: A child who is neglected in that:

1. the child is a foundling whose parents have made no effort to maintain a parental relationship with the child and reasonable efforts have been made to identify the child and to locate the parents for a period of at least 4 weeks since the child was found;
2. the child's parent gave a false identity at the time of the child's birth, since then has made no effort to maintain a parental relationship with the child and reasonable efforts have been made to locate the parent for a period of at least 4 weeks since his or her disappearance;
3. the child's parent, guardian or custodian is known but has abandoned the child in that he or she has made no reasonable effort to maintain a parental relationship with the child for a period of at least 4 months; or
4. the child has resided in a D.C. hospital for at least 10 calendar days following birth of the child, despite a medical determination that the child was ready for discharge from the hospital, and the parent, guardian or custodian of the child did not undertake any action or make any effort to maintain a parental, guardianship, or custodial relationship or contact with the child. (D.C. Code § 16-2316(d)).

Abandonment: when a child is left alone or with others and the child's caretaker did not return or make his or her whereabouts known. (AFCARS, 45 CFR § 1355 App. A).

Abuse: When a parent, guardian or custodian inflicts or fails to make reasonable efforts to prevent the infliction of physical or mental injury upon a child, including excessive corporal punishment, an act of sexual abuse, molestation or exploitation, or an injury that results from exposure to drug-related activity in the child's home environment. (D.C. Code § 16-2301 (23)).

Active: Status of a case in which an investigation is being conducted or services are being provided by Child and Family Services Agency (CFSA) and/or a contractual agency. See also, open

Adjudication: See fact-finding hearing

Administrative Review: One of two types of periodic review that meet federal requirements pertaining to cases of children in foster care. The system of case reviews established by P.L. 96- 272 is intended to: 1) assure that the child has a case plan which meets federal requirements; 2) review the status of the child; and 3) assure that certain procedural safeguards are applied in the case with respect to the legal rights of the child and the parents. Federal law requires that an administrative review be open to the participation of the parents of the child and conducted by a panel of appropriate persons at least one of whom is not responsible for the case management of, or the delivery of services to, either the child or the parents who are the subject of the review. See also, periodic review and P.L. 96-272. (P.L. 96-272, the "Adoption Assistance and Child Welfare Act of 1980" section 475(5)(B)).

Adoption: The method provided by State law which establishes the legal relationship of parent and child between persons who are not so related by birth, with the same mutual rights and obligations that exist between children and their birth parents. This relationship can only be termed "adoption" after the legal process is complete. (AFCARS, 45 CFR § 1355 App. A).

Adoption Assistance: a program established by Title IV-E of the Social Security Act ("Title IV-E") and which provides resources for the placement of children, with special needs, in adoptive homes.

Adoption Assistance Agreement: a written document which states the understanding between a child's adoptive parents and CFSA regarding the funding that will be paid to the adopters to meet the child's special needs.

Adoption Decree: Under D.C. law, a final or interlocutory (interim) decree granted when the Court finds that the prospective adoptee is suitable for adoption, the adoptive parent(s) can provide for the adoptee and that the adoption will be in the best interests of the prospective adoptee. A final decree may not be granted until the prospective adoptee has lived with the prospective adoptive parent for at least 6 months. (D.C. Code § 16-309).

Adoption Finalization: The finalizing of the adoption process with the final adoption court decree.

Adoption Plan: The plan for recruiting and matching an adoptive family with the child to be adopted.

Adoption Subsidy: Payments made on a short- or long- term basis pursuant to an agreement between D.C. and an adoptive family concluded prior to an adoption. The payments are made on behalf of a child with special needs when it appears that adoption could not take place without financial aid. Eligibility for a subsidy pertains to the child and continues until the child reaches 18 years of age, with reviews of continuing need annually. Subsidized adoptions may be funded under Title IV-E of the Social Security Act, by D.C. or through other public or private resources. (D.C. Code § 3-115) .See also, special needs.

Adoptive Home (Pre-finalization): The District of Columbia, in its regulations, includes families waiting to adopt when it defines an adoptive family as "a household, which has been approved by a child-placing agency to accept a child for adoption, which may be awaiting placement of a child or may have a child in the home" (29 DCMR § 1645.1). Federal law, on the other hand, distinguishes families waiting to adopt from those who have adopted a child by defining the former as "pre-adoptive" homes and the latter as "adoptive" homes (AFCARS, 45 CFR 1355, Apps. A and B) .See Pre-Adoptive Home.

Adoptive Home: A home in which a child is living following finalization of Court adoption proceedings which make the child legally a member of the family residing in the household. The family may or may not be receiving an adoption subsidy on behalf of the child.

Adoptive Parent: A person with the legal relation of parent to a child not related by birth, with the same mutual rights and obligations that exist between children and their birth parents. (AFCARS, 45 CFR § 1355 App. A) .In Defining "adoptive parent", D.C. regulations include not only an individual "who has adopted a child", but also "a single or married person with whom a child has been placed for adoption" (29 DCMR 1645.1). Under D.C. law, "the term 'adoptive family' includes single persons". (D.C. Code § 3-115).

AFCARS: The Adoption and Foster Care -Analysis and Reporting System established under a federal mandate to provide for effective tracking, managing and reporting of information pertaining to children and families served by public foster care and adoption agencies in the United States. (In general, 45 CFR §§ 1355.40, 1355.53 and 1355 App. A-E).

AFCARS ID: This is the Record Number field value used in the AFCARS data submission or the value which would be assigned.

AFDC Relatedness: With the passage of TANF, the Title IV-E financial eligibility criteria was established as the former Aid to Families with Dependent Children (AFDC) financial eligibility criteria in place as of 7/14/96.

Affidavit of paternity: a document where a birth mother identifies who the birth father of the named child is, their last contact with the birth father and his last known whereabouts. This form needs to be notarized.

Agency: District of Columbia, Child and Family Services Agency.

Aid to Families with Dependent Children (AFDC): A program, also known as welfare, established under Title IV-A of the Social Security Act to provide financial support for poor children and their families. AFDC and MA benefits may continue after the relative has assumed guardianship of the child.

Alcohol: Alcohol is the most commonly used and widely abused drug in the country. It is found in beers, wines and hard liquors.

Allegation: See report.
